Sustainable Purchasing Policy

The Sustainable Purchasing Policy of Mimet S.A. objective is to promote the adoption of social and environmental sustainability criteria, associated with economic-financial ones, in the process of acquiring goods and contracting services by Mimet S.A.

In addition to valuing planning and efficiency in the use of resources, the policy promotes the efforts of Mimet S.A. in stimulating the adoption of sustainable practices among its suppliers, thus extending the benefits to the whole of society.

Beginning

- ✓ Efficiency in the use of resources, reducing, reusing and recycling them, minimizing the need to acquire goods and contract services
- ✓ Planning the acquisition of goods and services as an essential instrument for sustainable development.
- ✓ Dissemination of sustainability concepts and practices in society.

Guidelines

Base purchasing decisions on a long-term vision that integrates the needs of all the fundamental units of Mimet S.A.

Examine, whenever possible, at the time of demand for purchases, the Life Cycle of the objects to be acquired, seeking to identify their socio-environmental impact in the course of their existence, understood from the moment of extraction of the natural resource until the final discard.

Include, whenever possible, objective criteria of social and environmental sustainability, including those contained in the certification of institutions of recognized credibility in the Reference Term, Basic Project or other document that initiates direct acquisition processes carried out by Mimet S.A.

Promote programs to educate providers of goods and services and other allies about the importance of adopting social and environmental sustainability criteria in their activities.

Develop alliances with other organizations in order to articulate shared sustainable purchases

Share experiences in sustainable purchasing with other organizations, seeking continuous improvement of practices related to the subject.

Más que Refrigeración

Train employees and collaborators of Mimet S.A. involved in the procedures for acquiring goods or contracting services so that they kept up to date and informed about the issue of "sustainable purchasing".

Implement environmental awareness programs focused on the officials and collaborators of Mimet S.A., seeking the commitment of each one to sustainable consumption.

Cooperate with government entities and civil society seeking the development of sustainable practices in Chilean society.

To make the principles and guidelines of the Sustainable Purchasing Policy effective, Mimet S.A. define strategies such as the establishment and implementation of action plans, with objectives and goals; and the maintenance, control and monitoring of these sustainable purchases, among others.
